Lecture

arrays

arraylists (dynamic arrays)

functions, scoping

binarySearch function

scoping

problems

ArrayLists

Methods & Return Types

Square Root

Write a method to find square root of a number (using linear search)

Searching in Arrays

Linear Search

Searching algorithm to find the index of element in a given array.

Binary Search

Efficient searching algorithm to find the index of element in a given **sorted** array.

💡

Homework

🕐 **8 Mins**

Prime Number print!
